FOR IMMEDIATE RELEASE

June 26, 2009

Glunz & Jensen certifies Grupo Grafico Industrial GGI S.A. of Costa Rica on PlateWriters

Granger, Indiana – Maurico Nicolaas, of Grupo Grafico Industrial GGI S.A. of Costa Rica, completed training and is now certified on the Glunz & Jensen PlateWriters™ Series inkjet computer-to-plate image writers.

This certification allows Maurico and Grupo Grafico Industrial GGI S.A to sell, service and support print shops in Costa Rica, using the 4-up PlateWriter 2400 or the 2-up PlateWriter 2000. Glunz & Jensen is proud to welcome Maurico and Grupo Grafico Industrial GGI S.A to the PlateWriter Dealer family.

Glunz & Jensen iCtP PlateWriter Technical Specialist, Greg Hayden, educated Maurico on the concept behind the unique plate writing process of the Glunz & Jensen's iCtP PlateWriter systems. Theory orientation included knowledge of Glunz & Jensen's iCtP technology on how plates are imaged, the technological ground lay, liquid dots, iPlates, iPosition software, Harlequin RIPs and color proofing.

Maurico also received extensive practical training on how to install systems, generate images, plate handling, mechanical software calibration and electrical troubleshooting. As well, overall maintenance and support of both the PlateWriter 2400 and 2000 was covered, with extensive hands-on training.

Glunz & Jensen provides extensive training of all PlateWriter, plate processors, punch/bend and press registration equipment at its US headquarters in Granger, Indiana - just 100 miles from Chicago, Illinois.
